

EMPRC 2020 – European Mineral Processing and Recycling Congress

From 14 June to 17 June 2020 the international, peer-reviewed conference will go into its second round. It focuses on all aspects related to the physical and physico-chemical processing of primary and secondary raw materials. The aim of the conference is to gather professionals from industry, universities and research institutions to exchange, analyze and discuss the most recent innovations and developments of our industry.

Call for Papers

Prospective authors wishing to present papers are invited to submit the title, the name(s) of the author(s) and an abstract of approx. 400 words (in English). Authors of the selected abstracts will be notified of the acceptance of the papers beforehand.

EMPRC Exhibition

In conjunction with the 2nd European Mineral Processing and Recycling Congress – EMPRC 2020, an exhibition will be organized. This provides an excellent opportunity for attendees / delegates of processing plants and delegates of equipment manufacturers/service suppliers to discuss potential solutions, to solve actual problems or further upgrading of plant components/equipment. The exhibition represents a vibrant market place for communication of technical staff, management, consulting experts, university delegates and an extension of the technical lectures to the real hardware or software related questions.

International congress with focus on

General topics

- Environmental aspects
- Process economics
- Residue management
- Social and political acceptance

Raw materials

- Lignite, hard coal
- Consumer wastes
- Landfill mining
- Metallic and non-metallic ores
- MSWI bottom ashes
- Production wastes
- Salts
- Soil decontamination
- Tailings & dumps

Process technology

- Agglomeration
- Classification
- Comminution
- Dense medium separation
- Dewatering
- Froth flotation
- Gravity concentration
- Magnetic and electrical separation
- Maintenance
- Mechanical activation
- Process automation
- Process simulation
- Process-water treatment
- Raw material characterization
- Raw material handling
- Screening
- Mechanical activation
- Sensor-based sorting
- Wear protection
